**“Winning A Saturday Superdraw is Easy –
It’s Making a Profit That’s Difficult.”**

You probably already know that it takes 8,145,060 games to guarantee first prize in Saturday’s Lotto Superdraw. If you did have \$8 million to spend, you obviously would not make a profit, because most weeks, including Superdraws, First Prize is around \$800,000 to \$1.2 Million.

So, in our search to find the best way to play the Saturday Lotto Superdraws, we must look at what makes sense in terms of the best way to play. To start with, **we ONLY play Superdraws.** **The prize is obviously a lot bigger BUT the Odds of Winning and the Cost stay the same!**

Obviously, you can ensure you have all eight winning numbers (6 main +2 supplementary) if you simply mark all 45 numbers in eight games (three numbers marked twice) - but of course most people are too lazy to even mark their own coupons.

The next step is to ask, “How many games do we need to play to guarantee at least TWO winning numbers will be together?” The answer is just 15 games.

Because 15 games of 6 numbers equals 90 numbers in total, we make sure that we have all 45 numbers marked twice, ensuring that we have all eight winning numbers twice. With main and supplementary balls, this guarantees 16 winning numbers spread over 15 games. Isn't this a much better way to play than trusting everything to Lady luck?

The next step is to ask, “How many games do we need to play to guarantee three or more of the winning numbers together?”

The answer is 160 games. Because we play all 45 numbers at least 20 times, you are guaranteed at least 160 winning numbers, spread over 160 games, and arranged in such a way that three or more of the six main numbers MUST be together.

Playing 160 games is really a group entry; we recommend 10 to 20 people, maybe a workplace syndicate or a family syndicate. If you would like us to create these 160 games for you, please Paypal \$25 to terry.aust@gmail.com and we'll make it happen for you.

The next step up of course is to ask, "How many games do we need to play to guarantee **FOUR OR MORE** of the winning numbers together?" - **A result that guarantees a win of some kind.**

What if I told you that it takes only 1325 games to guarantee a win of some kind? That is just 0.01627% of the full 8,145,060 games required to guarantee first prize.

While this does not necessarily guarantee a profit, it does guarantee a win of some kind. In just 1325 games!

What we are essentially doing is **using advanced mathematics to get four or more of the eight winning numbers in at least 1 game**, and then using relying on Lady Luck to line things up from there; this is obviously a lot smarter than relying on Lady luck for all eight numbers (6main + 2 supps).

What is interesting is that the 1325 games deliver all 8 winning numbers at least 160 times. So, our Mathematical approach delivers at least 1280 winning numbers (including supps) spread over 1325 games.

Think about that for a moment. *A system 13 for Sat Lotto requires 1,716 games – And it is possible to get NO winning numbers at all!*

Yet, in just 1325 games you can GUARANTEE a Payout of some kind. In fact, **your 1325 games guarantee at least 1,280 winning numbers (incl. supps).**

And the cost of playing is subsidised by regular small wins, while improving the odds of getting all six main balls together.

However, 1325 games are far too expensive for our philosophy of ensuring that people play within their means.

So, strange as it may seem, you cannot actually buy this system - the only way to get involved is to join one of our Private Saturday Superdraw Private Syndicates.

We run syndicates with 20 members. This makes the cost affordable for everyone, around \$50 per share, with Half Shares available.

In addition, **we only play when there is a Saturday Superdraw**, every 6-8 weeks, so the cost is not excessive.

Another important point to remember is that the odds of winning Saturday Lotto in Australia are 1 in 8,145,060 for a single game – and the cost of playing is the same – whether the Saturday Lotto Jackpot is \$4 Million or \$20 Million. Neither the Odds or the Cost change, regardless of high the jackpot gets. This is another reason we only play Saturday Superdraws.

So, let's look at how our Private Saturday Superdraw Lotto Syndicates work.

How Our Private Lotto Syndicates Work

If you are a Lotto Agent, you can massively boost your income by **becoming an Agent for our "Must Win Something" Private Syndicates**. You can give people free copies of this Report until you have enough applicants to fill a Syndicate and then apply to us to create your numbers. Alternatively, this Report can be downloaded from www.WinningLottoBooks.com

My involvement is limited to creating a 1325 game system that will guarantee you have a win of some kind for your members. If you are already running a workplace or family syndicate, contact me at terry.aust@gmail.com and I will help you set this up.

My share as a permanent member of the group is in exchange for my expertise in setting up a syndicate for you that is guaranteed a win of some kind.

THE MEGA SYSTEM – We can also achieve a Guaranteed Win of some kind using 368 x System 8's. More expensive, but with System 8's, a better chance of hitting the Jackpot and more prizes won. Ring Terry on 0468 420 470 or email terry.aust@gmail.com for full details.

OK – But Does It Work?

A fair question. Once you have everything set up, I will email the 1325 games to you (these are different for each lotto syndicate, **your numbers are unique to you**). Your numbers will be in the format of an Excel spreadsheet, which you can print out and give to members. This also helps to check the numbers by using the find and replace function within Excel (I use, find 9 and replace with 9M, or 9S). The easiest way of course for Lotto Agents is to simply run your tickets through your terminal.

This should be sufficient proof that **no matter what numbers are drawn, we will always have a win of some kind, no matter how small**. In addition, you can use the Excel find and replace function to check as many winning numbers as you like.

And, of course, if we get four winning numbers, or 3 main + a supp, every week, we are well on the way towards getting a bigger prize; especially with over 1280 winning numbers overall, spread over 1325 games.

**Includes Screenshots of Actual
Coupons and "Winner" Stamp**

**6 Wins were Minor Prizes, not First Prizes; But We Have Won
First Prize 3 Times! We Play For Regular Small Wins, As Well As First Prize**

This is designed for Monday, Wednesday, and Saturday Lotto, and is cheap enough for individuals to play.

Full details are at www.WinningLottoBooks.com

About Us

I have won First Prize on three separate occasions. The first was using 50 different system 8's way back in 2006. The second was using 17 different system 11's in 2010. Our latest win was in 2015, using 74 different system 8's. Proof can be found at www.WinningLottoBooks.com

All of these Syndicate entries were constructed using a scientifically configured approach, using the information published in "1000 weeks of Lotto", along with the vast experience I have gained from working with lottery syndicates over the last 20 years.

In addition, I have won several different five number prizes, including \$76,000 from a Division 2 Australian Powerball Syndicate (one number away from a \$22 million win). I also have a Lotto book showing how I won the lottery six weeks out of 10 (minor wins only), playing the Lottery at a discount of almost 40%. (please see www.WinningLottoBooks.com for details).

My background is as an international Management Consultant with 13 years overseas experience. I have qualifications as a Management Consultant and am a Fellow of the Institute of Management (UK) and a Fellow of the Chartered Institute of Management Accountants. I have had a fascination with numbers all of my life and enjoy the challenges of putting together Lotto syndicates, including using the skills from my business life alongside my fascination with analysing the best way to play lotto.

I look forward to setting up a Private Lotto Syndicate for you.
